PERSONAL PROFILE

Third-year Information Technology (Software Engineering) student at Eduvos with hands-on experience across full-stack web development, backend systems design, networking, and cybersecurity. Consistently achieves distinctions across programming, security, and research modules, including an 89% average in Research Design and Methodology. Comfortable working independently or in a team, with practical experience building e-commerce platforms, backend registration systems, and mobile applications, alongside real-world experience instructing others and working directly with clients. Looking to bring a strong technical foundation, a fast and adaptable learning style, and genuine reliability to an IT team.

EDUCATION

Eduvos (2023 – Present)

Bachelor of Science in Information Technology – Software Engineering (Year 3, final year)

- Class Representative

8 modules passed with distinction over the last three years:

Year	Module	Mark
2024	Procedural Programming	84%
2024	Computer Skills (Microsoft)	75%
2025	Programming in Python (elective)	74%
2025	Database Systems	74%
2025	Software and Security Engineering	77%
2026	Web Development and e-Commerce	78%
2026	Object Oriented Systems Analysis and Design	78%
2026	Research Design and Methodology	89%

Sentraal High School, Bloemfontein

Matriculated with a focus on Computer Applications Technology and Technical Sciences.

TECHNICAL SKILLS

- Programming Languages: JavaScript, HTML, CSS, Python (Intermediate), SQL, C# (currently learning)
- Web & Backend: PHP, MySQL, local-storage-based data persistence
- Networking: Cisco Packet Tracer, DHCP setup, IP configuration, router and switch setup
- Cybersecurity Tools: Kali Linux, Ubuntu, Virtual Machines
- Software & Platforms: Android Studio, Visual Studio Code, Microsoft Office (Word, Excel, Access), Git/GitHub
- Operating Systems: Windows, Linux (including clean installs via bootable USB)
- AI Tools: Practical experience integrating AI tools into a development workflow to improve efficiency

CERTIFICATIONS & LICENCES

- Valid driver's licence (held 3+ years)

WORK EXPERIENCE

Computer Repair Technician (Freelance / Informal)

Ongoing

- Diagnose and repair faulty hardware for paying clients, including replacing SSDs in laptops
- Run diagnostic tests to identify hardware and software issues
- Perform clean Windows installations via bootable USB

Airgun Range Instructor (Event-Based)

Shooting sports experience: Grade 5 – Matric (approx. 7 years)

- Instructed participants at an event in the safe handling and operation of PCP air rifles
- Explained how the equipment works, safety procedures, and effective range/capability to first-time shooters
- Applied core range-safety principles: equipment checks, controlled loading and firing procedures, situational awareness, and clear risk communication

Waiter — Food & Beverage Service

- Provided front-of-house customer service and worked efficiently under pressure

Catering & Event Assistant (Volunteer)

- Worked at tills and managed food distribution during large university events

PROJECTS

TradeShield / "CashCrusader" C2C E-Commerce Platform — ITECA3-12

- Built a full working consumer-to-consumer demo platform from scratch (HTML, CSS, JavaScript, PHP, MySQL)
- Implemented product listing, buying, and shipment-tracking functionality
- Delivered design diagrams, a responsive prototype, and a GitHub submission

Registration Processing Engine — ITEPA3 (Enterprise Python Applications)

- Designed and built the full backend for a student registration and course-selection system
- Implemented both sequential and concurrent processing (ThreadPoolExecutor) with thread locks for safe seat allocation
- Engineered the system to eliminate deadlocks and prevent data loss under concurrent load

AI Career Companion — Group Final-Year Android Project

- Contributed to the design and pivot of a community app connecting software engineering students with AI-related articles, Q&A, and courses
- Helped define the database structure, user-verification workflow, and system architecture (Android Studio, Java, Firebase)

Blind Scribe — Personal Game Project (in development)

- Co-developing a game in C# with a friend, hosted on GitHub
- Contributes game-design direction and codes selected components

Network Configuration Project

- Designed and configured a network system using Cisco Packet Tracer (routers, switches, DHCP)

SOFT SKILLS

- Strong communication and teaching ability, developed through instructing others
- Safety-conscious and responsible when handling equipment and following procedures
- Quick learner who adapts fast to new tools, languages, and environments

- Performs well under pressure, in both service roles and technical delivery
- Balances team collaboration with independent ownership of technical work

HOBBIES & PERSONAL INTERESTS

- Running — completed a half marathon distance unofficially
- Creative writing — has written several (unpublished) books as a hobby
- Enjoys reading research papers
- Extensive medical knowledge; has worked alongside paramedics
- Beginner-level photography

CAREER OBJECTIVE

To secure a role in the IT industry, ideally in software development, where I can apply my full-stack and backend development experience, continue growing technically, and contribute to a team that values reliability, initiative, and continuous learning.
